

Radiant QuikDose Web Calculator

EQD2 / BED in the browser — single, cumulative, and remaining-budget.

DEPLOYED

The QuikDose web calculator is live in the password-protected section of the Radiant site. It runs entirely in the browser with nothing saved or transmitted.

WHAT IT DOES

Three tabs on one page: Single Course (convert a dose/fractionation to EQD2 and BED), Cumulative EQD2 (sum prior courses with per-OAR α/β and time-dependent recovery), and Remaining Budget (back-convert a remaining EQD2 budget to a physical dose per fraction). Built-in α/β starting values are editable. Nothing leaves the browser.

KEY CAPABILITIES

Single Course

Physical dose / fractionation in, EQD2 + BED out.

Cumulative EQD2

Unlimited prior courses with per-OAR α/β .

Remaining Budget

Back-convert a remaining EQD2 to physical dose per fraction.

Editable α/β

Starting values are editable; your policy takes precedence.

Browser-Only

Nothing saved, nothing transmitted.

Print Results

Branded printable result for the chart or the consult note.

WHO IT'S FOR

- Quick chairside EQD2 / BED checks
- Re-irradiation prep before opening Eclipse
- Bedside teaching on the LQ model

- Independent verification of a planning-system calculation

HOW TO GET ACCESS

Open the calculator at radiant-mpc.com/quikdose-calc.html. Access password is supplied with your QuikDose agreement. To request access, email info@Radiant-MPC.com.
