

USERS GUIDE

Radiant QuikFlow

Offline-first income, expense, and P&L tracker for the single-member LLC.

OVERVIEW

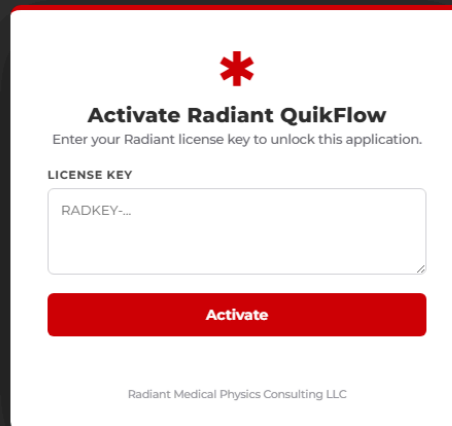

What QuikFlow is.

Radiant QuikFlow is income, expense, mileage, and P&L tracking for the single-member consulting LLC — an offline-first, installable PWA that keeps every number on your own device.

Who it's for

- Independent consulting physicists running a single-member LLC.
- Anyone whose income is primarily 1099 consulting payments.
- Two jobs: clean annual tax preparation, and a quick monthly profit-and-loss review.

QuikFlow is the successor to QuikXpense — the full expense, trip, mileage, and receipt-scanning workflow is intact, with income tracking, a dashboard, and a P&L report added.

QUIKFLOW DASHBOARD — MONTH-TO-DATE AND YTD.

Install and first-run.

Open the app

QuikFlow lives at app.radiant-mpc.com/apps/quikflow/. Open the URL once and the service worker caches the entire app for offline use.

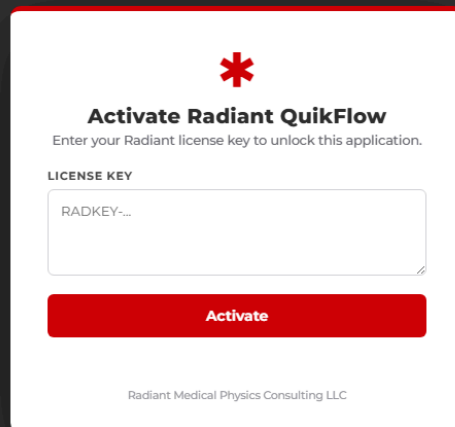

Install to your device

- **iPhone / iPad:** Share → Add to Home Screen.
- **Android:** Chrome menu → Install app.
- **Desktop (Chrome / Edge):** Address-bar install icon → Install QuikFlow.

Set your business profile

Open *Settings* and enter your business name, the start of your fiscal year, the default mileage rate, and your tax categories. The profile lives in IndexedDB on the device.

No cloud. QuikFlow makes zero network calls in normal operation. Optional AI receipt-scanning is the only feature that touches the network, and it is off by default.

Log income, expenses, and mileage.

Income

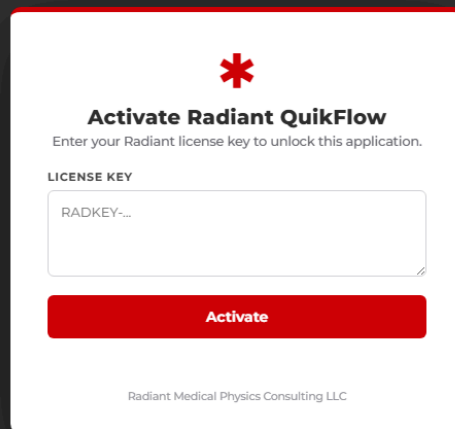

From the *Income* tab: click *+ New*, pick the payer (stored in a per-business roster), pick the category, enter the amount and date. Or paste a CSV / Excel export from your bank — QuikFlow maps columns, previews the parse, and asks for confirmation before importing.

Expenses

From the *Expenses* tab: log an expense with category and receipt photo. Group expenses by client engagement into *trips* — a trip rolls up its expenses and mileage for client billing.

Mileage

From the *Mileage* tab: enter the date, miles, purpose, and tie it to a trip. QuikFlow values it at the IRS standard rate set in your profile.

EXPENSES VIEW — CATEGORIZE AND ATTACH A RECEIPT.

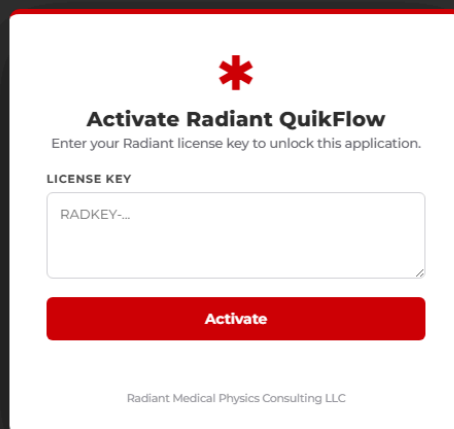

Receipt scanning + reports.

Optional AI receipt scanning

Take a photo of a receipt and let Claude pull the amount, merchant, and date into the form. This is the one optional online feature — turn it on in *Settings* and supply your Anthropic API key.

P&L reports

From the *Reports* tab: pick a period (month, quarter, year-to-date, or custom range). QuikFlow renders a profit-and-loss report with subtotals by category, ready to export as CSV or PDF for your accountant.

MILEAGE VIEW — IRS-RATE AT THE DATE ENTERED.

Hand-off to your accountant.

At year-end, generate the full P&L for the calendar year and export as PDF. Pair it with the income CSV and the expense CSV and your accountant has every line item to drop into the Schedule C.

- **P&L PDF** — printable summary with category subtotals.
- **Income CSV** — every 1099 payment with payer, category, amount.
- **Expense CSV** — every expense with category, vendor, amount, trip linkage.
- **Mileage CSV** — every mileage entry with date, miles, purpose.

Tax prep aid, not advice. Review all figures with a CPA before filing.

License, safety, and how to reach us.

License terms

QuikFlow is licensed per device and per user. The hosted instance is provided as a customer benefit; data lives on your device only.

Privacy

All books data is stored locally in your browser's IndexedDB. The running app makes zero network calls. Optional AI receipt-scanning is the only feature that contacts the network; it is opt-in.
