

Radiant QuikCARE

Customized Approach to Radiation Education — personalized patient packets.

IN DEVELOPMENT

QuikCARE is on the build queue. The packet-assembly engine, physician roster, and treatment-site library are scoped; deployment targets a per-practice local web app.

WHAT IT DOES

Enter patient name, date of birth, physician, and treatment site — QuikCARE generates a polished, site-specific, physician-signed education packet in branded Word, with PDF output when LibreOffice is available. The clinical team manages physicians, sites, and branding through the web interface — no code, no developer.

KEY CAPABILITIES

Personalized Packets

Four-field form in, branded Word/PDF packet out.

Physician Roster

Bios, credentials, headshots, signed welcome letters.

Treatment-Site Library

Diagnosis, simulation, side-effect, self-care content.

No-Code Editing

Add physicians and sites entirely through the web UI.

Practice Branding

Upload logo + brand colors that apply to every packet.

Dashboard

Configured physicians + sites and recent packets at a glance.

WHO IT'S FOR

- Radiation oncology practices
- Front-desk and patient-navigation staff
- New-patient onboarding workflows
- Multi-physician departments

HOW TO GET ACCESS

QuikCARE is not yet deployed. To pilot at your practice or join the launch list, email info@Radiant-MPC.com.
