

Radiant QuikRef

One question in, one cited answer out — local regulatory reference.

IN DEVELOPMENT

QuikRef is on the build queue. The local vector store, retrieval pipeline, and citation-strict synthesis layer are scoped; deployment targets a workstation-local app with a curated corpus you own.

WHAT IT DOES

Ask in plain language. QuikRef retrieves the relevant passages from your corpus (NRC 10 CFR, state regs starting with Ohio OAC, plus AAPM / ACR-ASTRO / ASTRO guidance) and synthesizes a single structured answer with strict inline citations to source document, section, and page. It surfaces disagreements between sources and says "not addressed" rather than guessing. Click-through to the cited page in the original PDF for in-context verification.

KEY CAPABILITIES

One-Question Search

Plain-language ask; structured single answer.

Multi-Source Corpus

NRC 10 CFR + state regs + AAPM / ACR-ASTRO / ASTRO.

Strict Citations

Every claim ends in an inline citation.

Conflict Flagging

Surfaces disagreement; "not addressed" instead of guess.

Click-Through

Jump to the cited page in the original PDF.

Local-First

Local vector store; corpus + queries stay on the workstation.

WHO IT'S FOR

- Clinical medical physicists
- Radiation safety officers
- Regulatory and accreditation prep

- Physics residents and students

HOW TO GET ACCESS

QuikRef is not yet deployed. To pilot at your facility or join the launch list, email info@Radiant-MPC.com.
