

CLINICAL TOOL / LOCAL WEB APP

Radiant QuikCARE

A Customized Approach to Radiation Education — personalized patient packets in minutes.

Who it's for: Built for radiation oncology practices and the front-desk staff who prepare new-patient materials.

KEY FEATURES

- **Personalized Packets.**
Enter patient name, DOB, physician, and treatment site — get a polished, site-specific Word document and PDF.
- **Treatment-Site Library.**
Site-specific diagnosis, simulation, side-effect, and self-care content, organized in clear tabs.
- **Practice Branding.**
Upload a logo and set brand colors that apply to every packet the system generates.
- **Physician Roster.**
Manage radiation oncologist bios, credentials, and headshots; each packet carries a welcome letter signed by the physician.
- **No-Code Editing.**
Add physicians or treatment sites entirely through the web interface — no code changes to extend the system.
- **Dashboard.**
Configured physicians, sites, and recent packets at a glance, with quick-action buttons.
