

CLINICAL TOOL / LOCAL WEB APP

Radiant QuikLog

One inventory for every linac, CT sim, chamber, and survey meter — sorted by what's due first.

Who it's for: Built for clinical medical physicists, QA leads, and Radiation Safety Officers who own the equipment master.

KEY FEATURES

- **Equipment Master.**
Linacs, CT sims, HDR units, ion chambers, electrometers, well chambers, survey meters — one searchable inventory.
- **Due-Soon Warnings.**
Color-coded OK / Due Soon / Overdue / No Date status with a configurable lead time. No more surprise overdue surveys.
- **Printable Reports.**
Full inventory PDF and a filtered "due in next N days" PDF for surveys, JCAHO visits, and annual physics reviews.
- **Calibration Schedule.**
Per-asset last-cal and next-due dates with configurable intervals, sorted by what's due first.
- **Calibration History.**
Every event recorded against an asset — cal date, performer, cert / ADCL number, and notes. Full audit trail.
- **Local-First.**
SQLite on the QA workstation — no cloud, no IT involvement. Same engine for standalone Windows and local web app.
