

CLINICAL TOOL / LOCAL WEB APP

Radiant QuikQA

PyLinac-powered TG-142 and MPPG linac QA in one local web app.

Who it's for: Built for clinical and QA medical physicists running TG-142 monthly and annual programs on a busy clinical schedule.

KEY FEATURES

- **Monthly & Annual QA.**
Guided TG-142 / MPPG 8.b worksheets with live tolerance grading and worst-of roll-ups — one consolidated PDF per session.
- **Picket Fence & VMAT.**
MLC leaf positional accuracy and DRGS / DRMLC dose-rate / MLC-speed constancy from a single delivery.
- **TG-51 Reference Dosimetry.**
Embedded TG-51 photon and electron calculators with ADCL chamber catalogs and one-click round-trip to the Annual.
- **Winston-Lutz.**
MV, kV, and CBCT isocenter and BB-coincidence analysis with sub-millimeter reporting.
- **MLC Leaf-Speed.**
Log-based per-leaf RMS error, beam holds, and combined batch reports — no portal dosimetry required.
- **DICOM & PDF Tools.**
Anonymizer to strip identifying tags, plus merge / split / watermark / number for QA reports.
