

CLINICAL TOOL / LOCAL WEB APP

Radiant QuikRef

Ask one question, get a synthesized, citation-backed answer from federal and state regulations.

RADIANT QUIKREF

Ask one question, get a synthesized, citation-backed answer from federal and state regulations.

Who it's for: Built for clinical physicists and Radiation Safety Officers who need fast, defensible answers from a large body of regulation.

KEY FEATURES

- **One-Question Search.**
Ask in plain language; QuikRef retrieves the relevant passages and synthesizes a single, structured answer.
- **Strict Citations.**
Every claim ends with an inline citation to the source document, section, and page.
- **Click-Through to Source.**
Jump straight to the cited page in the original PDF to read the passage in context.
- **Multi-Source Corpus.**
NRC 10 CFR, state regulations (starting with Ohio OAC), and AAPM, ACR-ASTRO, and ASTRO guidance.
- **Conflict Flagging.**
Surfaces disagreements between sources instead of papering over them — and says "not addressed" rather than guessing.
- **Local-First.**
Runs on your machine with a local vector store; your corpus and queries stay on the workstation.
