

CLINICAL TOOL / LOCAL WEB APP

# Radiant QuikShield

*NCRP Report 151 shielding design for megavoltage vaults — calculations shown, citations included.*

**Who it's for:** Built for clinical physicists and facility planners who design or evaluate megavoltage external-beam treatment vaults.

## KEY FEATURES

- **NCRP 151 Engine.**  
Primary barriers, secondary leakage and scatter, neutron shielding at 10 MV and above, and maze/door calculations.
- **Step-by-Step Audit Trail.**  
Every barrier shows its formula, the substituted values, the result, and the NCRP citation.
- **Editable Reference Data.**  
All NCRP tabulated data lives in inspectable JSON files — adjust values without touching code.
- **Drawing Calibration.**  
Drop in a PDF or PNG plan view, set the scale with two clicks — distances and scatter angles compute automatically.
- **Clinic-Ready Reports.**  
Generates a Word report with the annotated drawing embedded, ready for review and submission.
- **Optional AI Sanity Check.**  
Optional plain-language explanations and review pass over inputs and results — every calculation works without it.
